Professional Summary

Software engineer combining full stack development, cloud infrastructure and applied artificial intelligence (AI). Founder of Axynoxia and Full Stack Engineer at Bassetti Group. Build web and mobile applications, automate deployments and operate their infrastructure. Experience includes Azure Stack Hub, AWS EKS, infrastructure as code, observability and large language model (LLM) integration.

Technical Skills

Software: TypeScript, JavaScript, Python, C#, Java, PHP, Bash, SQL; React, Next.js, Angular, Flutter; Node.js, NestJS, Express, FastAPI, Flask, .NET, Spring Boot, Symfony.
Cloud & DevOps: Azure, Azure Stack Hub, AWS, EKS, AKS, OpenStack; Docker, Kubernetes, Helm, Terraform, Ansible; Jenkins, GitHub Actions, GitLab CI, CI/CD.
AI & automation: LLM integration, repository analysis, deployment recommendations, Python automation, web scraping, workflow integration.
Data & operations: PostgreSQL, MongoDB, MySQL, Redis, Prisma, Firebase; Prometheus, Grafana, SonarQube, Trivy, Nexus; Linux, Windows Server, Commvault, Fortinet; OAuth2, IAM, RBAC.

Professional Experience

Full Stack Engineer | Bassetti Group, TEEXMA
Apr 2026 to Present | Tunis

- Develop enterprise applications for technical and scientific data management using .NET, Angular and JavaScript on the TEEXMA platform.
- Maintain Delphi modules and containerize application workloads with Docker; contribute to delivery automation.

Founder & Software Engineer | Axynoxia
Jan 2026 to Present | Tunis | www.axynoxia.com

- Lead client delivery from requirements and architecture through implementation, CI/CD, deployment and production operations.
- Build web platforms, a Flutter mobile app, ticketing systems, a real estate CMS and Shopify storefronts; integrate payments and transactional email.
- Develop internal ERP, ticketing, invoicing, CRM and energy management products, with hosted demos and ongoing development.

Infrastructure Consultant | RFC
Oct 2025 to May 2026 | Ariana

- Engineer hybrid cloud infrastructure combining Azure Stack Hub and Azure; support enterprise networking with Fortinet and Cisco.
- Administer Commvault backups, restore validation and incident analysis; automate recurring Linux and Windows Server operations.
- Build Python/Flask telemetry exporters and Prometheus/Grafana dashboards for infrastructure and virtual machine monitoring.

Earlier Experience

DevOps Platform Engineer, Final Year Project | RFC
Feb 2025 to Aug 2025 | Ariana | QuickOps public code

- Built QuickOps, a DevOps as a Service platform with React, Express, FastAPI and MongoDB to analyze, deploy and monitor applications.
- Integrated an LLM analysis engine to inspect repository structure, dependencies and runtime needs, then recommend VM or Kubernetes deployment.
- Automated VM provisioning with Terraform, Ansible and Docker Compose; implemented AKS deployment templates for microservices.
- Built Jenkins pipelines with SonarQube, Nexus, Prometheus and Grafana. Validated both deployment paths using two MERN e-commerce applications.

Cloud & Full Stack Engineer Intern | RFC
Jul 2024 to Aug 2024

- Developed an intern management application and deployed containerized workloads on AWS EKS.
- Implemented CI/CD with Jenkins, Docker, Terraform and GitHub Actions; added IAM controls and monitoring with Prometheus and Grafana.

Web Developer Intern | ESPRIT
Jul 2023 to Aug 2023

- Built a course discovery platform using Python scraping of official education websites, structured metadata, search, filtering and recommendations.

Network Engineer Intern, C-NOC | Tunisie Telecom
Aug 2021 to Sep 2021

- Monitored enterprise connectivity in the B2B Network Operations Center and assisted with routing and service availability incidents.

Cloud, DevOps & Software Projects

Azure Stack Hub Monitoring | RFC
Python/Flask exporters collect infrastructure and VM telemetry through OAuth2 authenticated Admin APIs; Docker, Prometheus and Grafana provide dashboards and alerts.

DevOps CI/CD Hub | ESPRIT
Jenkins pipelines for Angular and Spring Boot applications, with SonarQube quality checks, Trivy security scanning and Nexus artifact management.

OpenStack Private Cloud Lab | ESPRIT
Multi-node private cloud with virtual networks, subnets, compute, storage and VPN connectivity for application workloads.

MERN E-commerce | Independent project
React and Redux storefront with Express, MongoDB, JWT authentication, Argon2 password hashing, order administration and asset uploads.

New Journey & Jektis Travel | Independent projects
Symfony 7/PHP 8.2 consulting platform with Doctrine, Turbo, Stimulus and RBAC; PHP travel platform with booking workflows, price scraping and email notifications.

Education & Languages

Software Engineering Degree | ESPRIT | 2020 to 2025 | Ariana
General software engineering; specialization in Cloud Architecture and DevOps (ArcTIC).
Languages: Arabic (native), English (B2), French (B2).

Client Projects

B'moovd Ticketing | bmoovd-shop.com
Next.js and tRPC ticket shop with MongoDB/Prisma, payment integrations, signed QR tickets, camera check-in and emailed PDFs.

B'moovd Mobile App | App Store | Google Play
Flutter app for venue discovery and reservations, with Firebase authentication, Firestore, Cloud Functions, storage and payment integration.

Roehrdanz Immobilien | rimmobilien-test.de
React, Express and MongoDB real estate CMS with listing administration, image uploads, role based access and searchable property content.

Confortex & Vie Sublime | confortex.shop | viesublime.tn
Shopify storefronts with custom themes, collection catalogs, editorial content, newsletter integration and showroom information.

Habiter Mieux | habiter-mieux.info
Solar installation website with service information and a quote request funnel connected to the client's enquiry workflow.

OMHY Entertainment | omhyfamily.com
React media and portfolio website with Chakra UI, GSAP animation, MongoDB/MySQL data services and Jenkins delivery pipelines.

NexGen Studios
Next.js App Router marketing website, containerized with Docker and served through Nginx.

Axynoxia Product Demos

Axynoxia ERP | erp.products.axynoxia.com
NestJS, Prisma, PostgreSQL and Redis modular ERP with module discovery, access management and dedicated client deployments. Product development is ongoing.

Tickety | tickets.products.axynoxia.com
React/Vite and TypeScript ticketing platform with order expiry, refund handling and end to end smoke tests in a pnpm monorepo.

Axynoxia Energie | energie.products.axynoxia.com
TypeScript energy management demo for solar and battery storage, with a plant simulator, telemetry, alarms and supervisory dashboards.

ProInvoice | invoice.products.axynoxia.com
React and Express/TypeScript invoicing application with MongoDB, two factor authentication, PDF/Excel export, email delivery and Swagger API documentation.

Axynoxia CRM & Leasing | crm-leasing.products.axynoxia.com
MERN lease management demo with financial calculations, role based access, Arabic RTL interface and background job processing.
