Professional Summary

Software engineer working across full stack development, cloud infrastructure and applied AI. Full Stack Engineer at Bassetti Group and founder of Axynoxia, a software engineering team delivering custom platforms, automation and cloud setups. Build web and mobile applications, automate their delivery with infrastructure as code and CI/CD, and operate them in production on Azure, AWS and Kubernetes, with LLM integration where it adds value.

Technical Skills

Cloud: Azure, Azure Stack Hub, AKS, AWS (EKS, IAM), GCP, OpenStack; hybrid cloud.
DevOps: Docker, Kubernetes, Helm, Terraform, Ansible, Jenkins, GitHub Actions, GitLab CI, SonarQube, Trivy, Nexus, Traefik.
Observability and operations: Prometheus, Grafana, ELK; Linux, Windows Server, Commvault, Fortinet.
AI: LLM integration, LangGraph, Temporal, Python automation.
Full stack: TypeScript, JavaScript, Python, C#, Java; React, Next.js, Angular, Flutter, Node.js, NestJS, FastAPI, .NET; PostgreSQL, MongoDB, Redis, Prisma.

Professional Experience

Full Stack Engineer | Bassetti Group, TEEXMA
Apr 2026 to Present | Tunis

- Develop enterprise applications for technical and scientific data management with .NET, Angular and JavaScript on TEEXMA, used across aerospace, energy, automotive, chemicals and pharmaceuticals.
- Maintain Delphi core modules, containerize workloads with Docker and contribute to delivery automation; 45 merged pull requests across 11 repositories, including Jenkins and Terraform CI.

Founder & Software Engineer | Axynoxia
Jan 2026 to Present | Tunis | axynoxia.com

- Lead a software engineering team delivering fixed-scope client projects: requirements, architecture, full stack build, cloud provisioning, CI/CD and production operations.
- Delivered 7 client projects, 6 in production: a Flutter app on the App Store and Google Play, a ticketing platform, Shopify storefronts, a lead generation site, an agency website and a real estate platform (preview).

Infrastructure Consultant | RFC (Microsoft Gold CSP Partner)
Oct 2025 to May 2026 | Ariana

- Engineered hybrid cloud infrastructure combining Azure Stack Hub and Azure, including sovereign cloud and data residency architectures, Fortinet SD-WAN and Cisco networking.
- Built Python/Flask exporters with Prometheus and Grafana monitoring for 2 Azure Stack Hub datacenters at 15-second resolution; administered Commvault backups with restore validation.
- Automated recurring Linux and Windows Server operations; delivered client workshops on cloud security and Microsoft 365 governance.

DevOps Platform Engineer, Final Year Project | RFC
Feb 2025 to Aug 2025 | Ariana

- Built QuickOps, a DevOps as a Service platform (React, Express, FastAPI, MongoDB) that analyzes, deploys and monitors applications.
- Integrated an LLM engine that inspects repository structure and dependencies to recommend VM or Kubernetes deployment.

- Automated VM provisioning with Terraform and Ansible and microservice deployment on AKS; built Jenkins pipelines with SonarQube, Nexus, Prometheus and Grafana; validated both VM and Kubernetes paths on 2 MERN applications.

Cloud & Full Stack Engineer Intern | RFC
Jul 2024 to Aug 2024

- Built an intern management application deployed on AWS EKS, with CI/CD (Jenkins, Docker, Terraform, GitHub Actions), IAM controls and Prometheus and Grafana monitoring.

Earlier Internships | ESPRIT, Tunisie Telecom
2021 to 2023

- Web Developer Intern, ESPRIT (2023): Python scraping and recommendation platform for online courses.
- Network Engineer Intern, Tunisie Telecom C-NOC (2021): B2B link monitoring and routing incident support.

Selected Projects

QuickOps. LLM repository analysis with automated Terraform, Ansible, AKS and Jenkins delivery and Prometheus and Grafana monitoring.

Enterprise Monitoring Platform | Azure Stack Hub. Dockerized Python exporters querying Admin APIs through an OAuth2 service principal; Grafana dashboards and alerts for region health, storage, tenant VMs and disk IOPS.

bmoovd Ticketing. Next.js 14, tRPC and Prisma ticket shop with Stripe, Mollie and PayPal checkout, signed QR tickets and camera check-in for FIFA World Cup 2026 public viewing events.

bmoovd Mobile App. Flutter app on the App Store and Google Play with Firebase Auth, Firestore, Cloud Functions and Stripe.

Roehrdanz Immobilien (preview). Bilingual real estate platform with React, Express and MongoDB: listings, search filters, agent enquiries, RBAC and dynamic SEO.

Habiter Mieux. Solar lead generation site for the French market with a qualification funnel and automated confirmation emails.

Confortex and Vie Sublime. Custom Shopify storefronts for bedding and furniture brands: catalogs, collections, SEO content and newsletters.

Digiqora Media. Content agency portfolio site, fast on mobile, with click-to-load video.
