tamim-hmizi.github.io/Portfolio/

Professional Summary

Software engineer combining full stack development, cloud infrastructure and applied artificial intelligence (AI). Founder of Axynoxia and Full Stack Engineer at Bassetti Group. Build web and mobile applications, automate deployments and operate their infrastructure. Experience includes Azure Stack Hub, AWS EKS, infrastructure as code, observability and large language model (LLM) integration.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C#, PHP, Bash, SQL, C, C++, Assembly.
Applications: React, Vite, Next.js, Angular, Vue.js/Vuex, Tailwind CSS, Chakra UI, shadcn/ui, Flutter; Node.js, NestJS, Express, FastAPI, Django, Flask, .NET, Spring Boot, Symfony; REST, WebSockets.
Cloud: Azure, Azure Stack Hub, AKS, AWS/EKS, GCP, OpenStack, DigitalOcean; hybrid cloud, IaaS/PaaS; Docker/Compose, Kubernetes, Helm, Terraform, Ansible, Traefik, Portainer.
Delivery & AI: Jenkins, GitHub Actions, GitLab CI, CI/CD, SonarQube, Trivy, Nexus, Git, Bitbucket, Gitea; LLM integration, repository analysis, Python automation, web scraping, LangGraph, Temporal.
Data & operations: PostgreSQL, MongoDB, MySQL, Redis, DynamoDB, Prisma, Mongoose, Sequelize, BullMQ, Firebase, MinIO; Prometheus, Grafana, ELK, CloudWatch; Linux (Ubuntu, CentOS), Windows Server, Active Directory, Microsoft 365, WSL, Commvault; Fortinet, Trend Micro, IAM, MFA, OAuth2, RBAC, encryption.

Professional Experience

Full Stack Engineer | Bassetti Group, TEEXMA
Apr 2026 to Present | Tunis

- Develop enterprise applications for technical and scientific data management using .NET, Angular and JavaScript on the TEEXMA platform.
- Maintain Delphi core modules and containerize workloads with Docker; contribute to delivery automation on a platform used across aerospace, energy, automotive, chemicals and pharmaceuticals.

Founder & Software Engineer | Axynoxia
Jan 2026 to Present | Tunis | tamim.hmizi@axynoxia.com

- Lead requirements, architecture, full stack delivery, cloud provisioning, CI/CD, observability and production operations; handle client relationships, technical scoping and commercial delivery.
- Build web platforms, a Flutter mobile app, ticketing systems, a real estate CMS and Shopify storefronts; integrate payments and transactional email.
- Develop internal ERP, ticketing, invoicing, CRM and energy management products, with hosted demos and ongoing development.

Infrastructure Consultant | RFC
Oct 2025 to May 2026 | Ariana

- Engineer hybrid cloud infrastructure combining Azure Stack Hub and Azure; support sovereign cloud and data residency architectures, Fortinet SD-WAN, network segmentation and Cisco networking.
- Administer Commvault backups, restore validation and incident analysis; automate recurring Linux and Windows Server operations.
- Build Python/Flask exporters and Prometheus and Grafana monitoring; deliver client workshops on cloud security and Microsoft 365 governance.

DevOps Platform Engineer, Final Year Project | RFC
Feb 2025 to Aug 2025 | Ariana | QuickOps public code

- Built QuickOps, a DevOps as a Service platform with React, Express, FastAPI and MongoDB to analyze, deploy and monitor applications.
- Integrated an LLM analysis engine to inspect repository structure, dependencies and runtime needs, then recommend VM or Kubernetes deployment.
- Automated VM provisioning with Terraform, Ansible and Docker Compose; implemented AKS Engine, kubectl and YAML deployment templates for microservices.
- Built Jenkins pipelines with SonarQube, Nexus, Prometheus and Grafana. Validated both deployment paths using two MERN e-commerce applications.

Cloud & Full Stack Engineer Intern | RFC
Jul 2024 to Aug 2024

- Developed an intern management application and deployed containerized workloads on AWS EKS.
- Implemented CI/CD with Jenkins, Docker, Terraform and GitHub Actions; added IAM controls and monitoring with Prometheus and Grafana.

Web Developer Intern | ESPRIT
Jul 2023 to Aug 2023

- Built a course discovery platform using Python scraping of official education websites, structured metadata, search, filtering and recommendations.

Network Engineer Intern, C-NOC | Tunisie Telecom
Aug 2021 to Sep 2021

- Monitored enterprise connectivity in the B2B Network Operations Center and assisted with routing and service availability incidents.

Education and Languages

Software Engineering Degree | ESPRIT | 2020 to 2025 | Ariana
Three years of general software engineering; two years specializing in Cloud Architecture and DevOps (ArcTIC). Arabic (native), English (B2), French (B2).

Projects

QuickOps | RFC final year project. LLM repository analysis and deployment recommendations, React, Express and FastAPI, Terraform and Ansible provisioning, VM/AKS delivery, Jenkins pipelines and Prometheus and Grafana monitoring.

Enterprise Monitoring Platform | Azure Stack Hub. Dockerized Python/Flask exporters query Admin APIs through service principal OAuth2; Prometheus and Grafana expose region health, storage fabric, tenant VM compute and disk IOPS, with dashboards and alerts.

Axynoxia ERP | Modular business management. NestJS, Prisma, PostgreSQL and Redis pnpm monorepo with single tenant deployments, module auto-discovery, access requests, MFA, RBAC, first-login rotation and Argon2 hashing; Docker Compose, Traefik and object storage.

Tickety | Event ticketing. React/Vite and TypeScript pnpm monorepo with bcrypt authentication, cookie sessions, checkout, pending-order expiry and concurrent refund handling; end to end smoke tests and Docker deployment.

Roehrdanz Immobilien | Real estate CMS. React 19, Express 5 and MongoDB CMS for listings and enquiries; employee sessions, bcrypt and RBAC, asynchronous Base64 images, dynamic SEO content, Vite and Tailwind property galleries.

B'moovd | Mobile reservations and discovery | Google Play. Flutter/Dart application for iOS, Android and web, published on the App Store and Google Play; Firebase Auth, Firestore rules/indexes, Cloud Functions, Storage, Stripe integration and store release pipelines.

B'moovd Ticketing | Event ticket shop. Next.js 14 App Router, strict TypeScript, tRPC and MongoDB/Prisma; Stripe, Mollie and PayPal checkout, signed JWT QR tickets, camera check-in, emailed ticket PDFs and VAT invoices; NextAuth roles and JWT sessions.

Confortex | Shopify storefront. Custom bedding storefront with product collections, SEO blog, newsletter integration, delivery promotions and contact information for three showrooms.

Vie Sublime | Shopify storefront. Custom furniture storefront with indoor, office, school and garden collections, editorial content, newsletter integration and showroom information.

Axynoxia Energie | PV/BESS management and SCADA. TypeScript services for domain model, API, control, HMI and simulation, modeled on ADAM plant design: 5.5 MWp PV, 2.2 MW/1.5 MWh BESS, two 8.25 MVA turbines and 20/11 kV interconnection. Telemetry, alarms and supervisory control behind a TLS proxy; excludes safety instrumentation.

ProInvoice | Invoicing platform. React 19/Vite, TanStack Query, React Hook Form and Zod with Express/TypeScript and MongoDB; two factor authentication, PDF/Excel invoice generation, transactional email and Swagger API documentation.

Axynoxia LeadGen | B2B prospecting. NestJS/Next.js project in development with Temporal and LangGraph workflows, waterfall enrichment, email verification gates, field provenance, provider attempt logs, outcome based credit billing, suppression, consent records and GDPR data subject requests.

Axynoxia CRM and Leasing | Lease management. MERN platform for lease origination through accounting, with IFRS 16/BCT oriented financial calculations, 10-role RBAC, Arabic RTL, background jobs and containerized deployment.

Habiter Mieux | Solar enquiry website. French solar installation site with service and subsidy information, search optimization and a quote request funnel connected to the client sales workflow.

MERN E-commerce | Retail application. React/Redux storefront, Express/MongoDB APIs, authentication, carts, favorites, categories, orders, inventory, uploads and metrics; monolithic and microservice deployment examples.

OMHY Entertainment | Media platform. React media and administration application for artists, groups, albums, songs, casting, news and newsletters; Express/MongoDB backend and Jenkins delivery configuration.

Jektis Travel | Travel booking. PHP travel application with city/offer management, reservations, feedback, registration, authentication and administration views.

New Journey | Consulting platform. Symfony 7/PHP 8.2 with modular controllers, Doctrine ORM, UX Turbo, Stimulus, multi-user authentication and RBAC; Docker Compose for reproducible environments.

DevOps CI/CD Hub | ESPRIT. Jenkins delivery pipelines for Angular and Spring Boot microservices, integrating SonarQube quality gates, Trivy security scanning and Nexus artifact versioning.

OpenStack Private Cloud Lab | ESPRIT. Multi-node cloud with virtual networks, subnets, compute, storage and VPN-over-physical connectivity; workload lifecycle, automated scaling and high availability routing.

NexGen Studios | Marketing website. Next.js App Router website, containerized with Docker and served by Nginx.
