Professional Summary

Software engineer combining full stack development, cloud infrastructure and applied artificial intelligence (AI). Founder of Axynoxia and Full Stack Engineer at Bassetti Group. Build web and mobile applications, automate deployments and operate their infrastructure. Experience includes Azure Stack Hub, AWS EKS, infrastructure as code, observability and large language model (LLM) integration.

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C#, PHP, Bash, SQL, C++, Assembly.
Applications: React, Vite, Next.js, Angular, Vue.js/Vuex, Tailwind CSS, Chakra UI, shadcn/ui, Flutter; Node.js, NestJS, Express, FastAPI, Django, Flask, .NET, Spring Boot, Symfony; REST, WebSockets.
Cloud: Azure, Azure Stack Hub, AKS, AWS/EKS, GCP, OpenStack, DigitalOcean; hybrid cloud, IaaS/PaaS; Docker/Compose, Kubernetes, Helm, Terraform, Ansible, Traefik, Portainer.
Delivery & AI: Jenkins, GitHub Actions, GitLab CI, CI/CD, SonarQube, Trivy, Nexus; LLM integration, repository analysis, Python automation, web scraping, LangGraph, Temporal.
Data & operations: PostgreSQL, MongoDB, MySQL, Redis, Prisma, Mongoose, Sequelize, BullMQ, Firebase, MinIO; Prometheus, Grafana, ELK, CloudWatch; Linux (Ubuntu, CentOS), Windows Server, Active Directory, Microsoft 365, WSL, Commvault; Fortinet, IAM, MFA, OAuth2, RBAC, encryption.

Professional Experience

Full Stack Engineer | Bassetti Group, TEEXMA
Apr 2026 to Present | Tunis

- Develop enterprise applications for technical and scientific data management using .NET, Angular and JavaScript on the TEEXMA platform.
- Maintain Delphi core modules and containerize workloads with Docker; contribute to delivery automation on a platform used across aerospace, energy, automotive, chemicals and pharmaceuticals.

Founder & Software Engineer | Axynoxia
Jan 2026 to Present | Tunis | tamim.hmizi@axynoxia.com

- Lead requirements, architecture, full stack delivery, cloud provisioning, CI/CD, observability and production operations; handle client relationships, technical scoping and commercial delivery.
- Build web platforms, a Flutter mobile app, ticketing systems, a real estate CMS and Shopify storefronts; integrate payments and transactional email.
- Develop internal ERP, ticketing, invoicing, CRM and energy management products, with hosted demos and ongoing development.

Infrastructure Consultant | RFC
Oct 2025 to May 2026 | Ariana

- Engineer hybrid cloud infrastructure combining Azure Stack Hub and Azure; support sovereign cloud and data residency architectures, Fortinet SD-WAN, network segmentation and Cisco networking.
- Administer Commvault backups, restore validation and incident analysis; automate recurring Linux and Windows Server operations.
- Build Python/Flask exporters and Prometheus/Grafana monitoring; deliver client workshops on cloud security and Microsoft 365 governance.

DevOps Platform Engineer, Final Year Project | RFC
Feb 2025 to Aug 2025 | Ariana | QuickOps public code

- Built QuickOps, a DevOps as a Service platform with React, Express, FastAPI and MongoDB to analyze, deploy and monitor applications.
- Integrated an LLM analysis engine to inspect repository structure, dependencies and runtime needs, then recommend VM or Kubernetes deployment.
- Automated VM provisioning with Terraform, Ansible and Docker Compose; implemented AKS Engine, kubectl and YAML deployment templates for microservices.
- Built Jenkins pipelines with SonarQube, Nexus, Prometheus and Grafana. Validated both deployment paths using two MERN e-commerce applications.

Cloud & Full Stack Engineer Intern | RFC
Jul 2024 to Aug 2024

- Developed an intern management application and deployed containerized workloads on AWS EKS.
- Implemented CI/CD with Jenkins, Docker, Terraform and GitHub Actions; added IAM controls and monitoring with Prometheus and Grafana.

Web Developer Intern | ESPRIT
Jul 2023 to Aug 2023

- Built a course discovery platform using Python scraping of official education websites, structured metadata, search, filtering and recommendations.

Network Engineer Intern, C-NOC | Tunisie Telecom
Aug 2021 to Sep 2021

- Monitored enterprise connectivity in the B2B Network Operations Center and assisted with routing and service availability incidents.

Education and Languages

Software Engineering Degree | ESPRIT | 2020 to 2025 | Ariana
Three years of general software engineering; two years specializing in Cloud Architecture and DevOps (ArcTIC). Arabic (native), English (B2), French (B2).

Projects

QuickOps | Applied AI and deployment automation. React, Express and FastAPI platform combining LLM repository analysis, Terraform/Ansible provisioning, VM/AKS deployment and Jenkins pipelines. RFC final year project.

Enterprise Monitoring Platform | Azure Stack Hub. Dockerized Python/Flask exporters, service principal OAuth2, Prometheus/Grafana dashboards and alerts for infrastructure, storage fabric and tenant VM compute/IOPS.

B'moovd Ticketing | Event ticket shop. Next.js/tRPC and MongoDB/Prisma; Stripe, Mollie and PayPal checkout, signed QR tickets, camera check-in, emailed PDFs and NextAuth roles.

B'moovd | Mobile reservations and discovery. Flutter/Dart app published on App Store and Google Play, with Firebase Auth, Firestore, Cloud Functions, Storage, Stripe and release pipelines.

Axynoxia ERP | Modular business management. NestJS, Prisma, PostgreSQL and Redis; module discovery, dedicated client deployments, MFA, RBAC, Argon2, Docker Compose and Traefik.

Axynoxia Energie | PV/BESS management and SCADA. TypeScript services and plant simulator for solar/battery telemetry, alarms and HMI supervisory control, modeled on ADAM plant design.

Roehrdanz Immobilien | Real estate CMS. React, Express and MongoDB platform with property listings, enquiries, employee sessions, RBAC, image processing and dynamic SEO content.

Confortex | Shopify storefront. Custom bedding storefront with collection architecture, SEO editorial content, newsletter integration, delivery promotions and showroom information.
